RTH Construction Co.,Ltd.
(RITTA HEMMARACH CO.,LTD)

“ A leading Thai-based design an engineering & construction company providing wide range of design and construction, civil and structural works and mechanical, electrical and sanitary systems to customers throughout Thailand”

**RTH Construction
Co.,Ltd.**
www.rth.co.th

Project System

**SAP Solution for
Engineering &
Construction**

The Challenge:

Project Systems that help the company to monitor and control by project based. The company aims to manage multiple project sites while the management and operation office can be able to monitor and control purchasing process, inventory management and cost control efficiently.

Because of business expansion and growth, Ritta Hemmarach is looking for solution that can serve with future business requirement of the company.

The Solution:

We are implementing SAP for this Engineering & Construction company. The preconfigured modules are **SD, MM, FI/CO and PS**

Many complexities were handled within this implementation which is planned to be completed in 6 months time. This has led to the development of our own SMB Engineering & Construction Template from the Business configuration sets for future implementations.

The Benefits:

SAP Best Practices and our experienced Consultants have re-defined the operational processes in procurement, inspection and inventory with substantial business benefits and ready ROI for the customer.
