## Single Integrated ERP system For Group of Companies

MySAP ERP Solution

### The Challenge:

Thai Parkerizing Co.,Ltd is a group of Japanese companies under Nihon Parkerizing Co.,Ltd from Japan. With about 4 manufacturing sites and 1 operation office in Samutprakarn & Gateway; and various products & services; both in chemical & heat and surface treatments, they have long been encountered with non integrated information and independent operations. Each business unit work on its own data and in such a way of their own responsibilities and discretion.

### The Solution:

We are implementing mySAP ERP for Thai Parkerizing Group of companies. The SAP modules are **SD, MM, PP, FI and CO**

Many complexities were handled within this implementation which is planned to be completed in 8 months time.

### The Benefits:

The solution help reduce sales cycle, minimize inventory level, improve inventory turnover and distribution planning, improve Financial and Accounting visibility and support valuable information for management to react to the market competition as well as improve customer's satisfaction.
